

U.S. Customs and
Border Protection

How Cargo Flows Securely to the U.S.

IN THE U.S.

- » More than 11 million cargo containers arrive on ships and are offloaded at U.S. Seaports each year.
- » CBP uses risk-based analysis and intelligence to pre-screen, assess, and examine 100% of suspicious containers.
- » Remaining cargo is cleared for entry to the U.S. using advanced inspection technology.
- » The Customs-Trade Partnership Against Terrorism ensures another layer of secure treatment for cargo entering the U.S.

OVERSEAS

- » Shipping companies are required, 24 hours in advance, to provide manifest data for all cargo containers destined for the U.S.
- » 100% of this data is then transmitted to the U.S. National Targeting Center for screening to identify high-risk cargo.
- » Under the Container Security Initiative, CBP partners with foreign customs authorities to examine all U.S.-bound high-risk cargo while it is still at foreign ports.

★ CURRENT CSI PORTS

Listed in order each port was made operational. Last port added 03/25/06.
